

Info for Anglo Celt – 17 April

Anglo Celt sent:

- Map of the whole proposed route.
- Release issued about the PB Power study on undergrounding
- Release issued about the progress to the next phase

In addition to this, we can confirm that the landowners along the proposed preferred route received packs from EirGrid. These included a letter, a brochure (please find attached) and maps. These maps are of their land and include some aerial shots. The brochure attached has also been posted to politicians, other stakeholders and members of the public.

At the moment EirGrid and its consultants are talking to landowners and have had many meetings already. An Environmental Impact Statement will have to be done on the proposed route. This will involve very detailed studies of the terrain etc. EirGrid is working towards trying to get a planning application to ABP ready for the winter of 2009.
