DSO Implementation Update

DSO Implementation Update

Intro to the Demand Connection Code

What?

New common minimum requirements for distribution connected demand response providers, transmission connected demand & the DSO.

Who?

This will not affect our existing customers operating as they do today. Applies to new demand customers who connect to the distribution system from September 2019 and wish to participate in "demand side units".

Usual process, like any Distribution Code mod. A approved by CRU and recommended by DCRP, representing generators, major customers, suppliers & other distribution system users recommends
