

# Enduring Connection Policy (ECP-1): 2018 Batch

August 2018

---

**Disclaimer**

All information provided is for information purposes only and does not constitute a legal contract between either System Operator and any person or entity unless otherwise specified. Prior to taking business decisions, interested parties should not rely on the data set out in this information paper as a substitute for obtaining separate and independent advice to the matters covered by this document. Information in this document does not amount to a recommendation or advice in respect of any possible investment. The use of information contained within this document for any form of decision making is done so at the user's own risk.

## Executive Summary

Enduring Connection Policy – 1 (ECP-1) is a new system for issuing connection offers for new generation and storage capacity. This replaces the older systems of “Gates” and “non-GPA”. This report contains the final list of applicants that meet the criteria to be processed as part of the 2018 batch following the closure of the applications window on 28 May 2018 and the capacity relocation window of the 29 June 2018. Capacity relocation requests that were received as part of the CRU’s decision<sup>1</sup> and the non-GPA applicants that opted to ‘fold in’ to the batch have also been listed below. This is summarised per table below:

	DSO	TSO	Total Applications	Total MEC (MW) <sup>2</sup>
<b>DS3</b>				
Battery	10	7	17	351
Hybrid		1	1	20
<b>Non-DS3</b>				
Biomass	1		1	2
CCGT		2	2	33
CHP	2		2	9
Gas	1		1	2
Solar	40		40	252
Wind	18	3	21	294
<b>Total new applications</b>				<b>963MW</b>
<b>Non-GPA fold in</b>				
Solar	9	11	20	842
Wind	1		1	1
				<b>843MW</b>
<b>Relocations</b>				
Solar	25		25	156
Wind	6	3	9	280
				<b>436MW</b>
	<b>113</b>	<b>27</b>	<b>140</b>	

### Selecting DS3 Applicants

- The DS3 Prioritisation Criteria (CRU/18/060) was used to finalise 371MW of DS3 applications
- This 371MW of DS3 projects have planning permission therefore only DS3 applicants with valid planning permission are included

<sup>1</sup> ECP-1 Ruleset (CRU/18/059), ECP-1 Capacity Relocation clarification note (CRU/18/094)

<sup>2</sup> Numbers rounded to next whole MW

### Selecting Non-DS3 Projects

- Projects with valid planning permission have been prioritised by date of expiry of planning permission
- Projects that have already had their planning permission extended must have 2 years remaining i.e. no earlier than 28/05/2020
- Projects that have not already had their planning permission extended must have 1 year remaining i.e. no earlier than 28/05/2019
- Where projects are planning exempt, a date of one year post the closing date for applications was assigned by the SOs as a planning expiry date for the purpose of prioritisation
- The date of expiry of planning permission of the last project to fall within the threshold was in Q3 2023. Any non DS3 project with an expiry of planning permission after this date has not been successful in being included within the 2018 batch

### ECP-1 Ruleset<sup>3</sup>

When assessing the scale of the applications that were received the SOs were cognisant of the principles of ECP-1 and conscious that the CRU's intention for ECP-1 is for it to lay "the foundations for future, more regular batches for connection". Also, the CRU has stated that "the priority should be to have a manageable batch size which can help connect a significant volume of generation in reasonable timeframe and allow for a further batch in the foreseeable future". The SOs agreed that ECP-1 is a first step in a fully Enduring Connection Policy and the 2018 batch size should not impede facilitating smaller, more frequent batches in the future supporting evolving key CRU objectives. The CRU has instructed the SOs to proceed on this basis and so the 2018 batch size has been set accordingly. Due to specific sizes of the applications received the DS3 allocation has been finalised at 371MW as the next DS3 application would exceed the 400MW threshold set by the CRU. Due to specific sizes of the applications received the non-DS3 allocation has been finalised at 592MW bringing the total new capacity in the 2018 batch to 963MW, as the next non-DS3 application would significantly exceed the 1,000MW threshold for new capacity as set by the CRU. The 2018 batch results have been confirmed by the CRU as being consistent with the ECP-1 decision.

### 2018 Batch Applications

#### *New Applications:*

The new applications received for the 2018 batch are summarised in table 1 below. Applications that are eligible for processing as part of the 2018 batch of ECP-1 are listed in appendix 1.

**Table 1: New Applications Summary**

---

<sup>3</sup> Detailed ruleset on the CRU website: <https://www.cru.ie/wp-content/uploads/2017/04/CRU18059-Annex-I-ECP-1-Ruleset.pdf>

Tech Type	DSO		TSO	
	MW	# Apps	MW	# Apps
Battery	588	34	1478	30
Biomass	2	1		
CHP	9	2	490	1
Gas	2	1		
Solar	552	78		
Onshore Wind	255	25	293	8
CCGT			33	2
Hybrid			20	1
OCGT			100	1
Reciprocating Engines			50	1
Offshore Wind			1247	6
	<b>1408</b>	<b>141</b>	<b>3711</b>	<b>50</b>

Over 2,100MW was received from applicants looking to be prioritised as a DS3 applicant. In assessing these applications against the DS3 criteria, the SOs found that all applicants received could provide the same level of service when it came to working through the prioritisation criteria as set out in CRU/18/060. The first way in which applications could be differentiated from one another was Level 1 Prioritisation (d): Planning Permission. There are consequently 18 applications totalling 371MW included in the 2018 batch as DS3 prioritised applications as the next application in planning priority would have materially exceeded the 400MW threshold.

Applications received that did not request DS3 prioritisation were assessed in the order of the planning permission expiry date. The SOs received approx. 3,200MW of these applications. The received complete date of the connection application was used to distinguish between these applications that had an expiry date in the same quarter. The quarter of expiry of planning permission of the last project to fall within the threshold was Q3 2023. Any project with a planning permission expiry date falling after this quarter was not successful in being eligible for this batch. There are 67 applications totalling 592MW eligible to be included in the 2018 batch as non-DS3 applications.

### ***2018 Batch Fold-in Applications***

As part of the CRU's ECP final decision the CRU directed the SOs to extend the opportunity to "fold in" to the 2018 batch to non-GPA applicants that had a live or in-process offer. The SOs will process 21 applications (843MW) that have taken up this offer. These applications will now be processed alongside the applicants that are included in the 2018 batch.

### ***2018 Batch – Capacity Relocations***

The CRU issued a clarification note on 25 May '18 which extended the three-month 'grace period' for projects to relocate capacity to projects with a live or in process offer. The window for applications for capacity relocations closed on 29 June 2018. There are 34 applications deemed acceptable for

processing. These applications relate to an existing 436MW that was already contracted, live or in process so it is not considered to be 'new capacity' for the batch. However the revised offers will be processed as part of the batch. In addition, some of these applications are also requested a change in generation type consistent with the COPP rules, amended by ECP-1 decision.

### **Next steps**

The SOs will now proceed to issue invoices to the relevant applicants that are eligible for processing within this batch for the balance of application fees. Applicants will have 1 month to pay the balance of fees as per the CRU timeline for this batch. Once fees have been provided the SOs will assign these applicants into nodes and begin scheduling connection offer dates.

## Appendix 1: ECP-1 2018 batch eligible applications
