Prior to taking business decisions, interested parties should not rely on the data set out in this information paper as a substitute for obtaining separate and independent advice to the matters covered by this document. Information in this document does not amount to a recommendation or advice in respect of any possible investment. The use of information contained within this document for any form of decision making is done so at the user's own risk.

Background

ECP-2 is the second stage of the CRU's development of enduring connection policy in Ireland. On the 10th June 2020 the CRU published their decision¹ on ECP-2, which set policy for at least three annual batches of connection offers (ECP 2.1, ECP-2.2, and ECP-2.3). Subsequently, the CRU published their decision on ECP-2.4², which set policy for an additional batch of connection offers (ECP-2.4).

The application window for ECP-2.4, closed on 30th November 2023. The System Operators (SOs) have used the ECP-2 decision paper¹, ECP-2 ruleset³ and the subsequent ECP-2.4 decision paper² to determine which applicants have been initially successful in making the list of 62⁴ projects due to receive connection offers under Category A.

This report contains the final list of applicants that will be processed under Category A as part of the 2023 ECP-2.4 batch following payment of the balance of application fees to the relevant SO. As per the decision paper, the first 25 projects in category A were selected on the basis of renewable output, with the projects having the largest volume of renewable GWhrs/yr generated being granted the highest priority. The subsequent 37 projects were selected in order of planning permission grant date. There is a cap of 10 storage and other system service technology projects in each ECP-2 batch - apart from these projects, all eligible applications to ECP-2.4 were accepted into the Category A batch.

Please note that the projects in Category A may change should projects not proceed with their application or no longer be deemed eligible.

Applicants are summarised in the table below:

Generation Type	Total Applications	Total Sum of MEC (MW)
Solar	25	1,232
Wind	9	358
Battery	7	560
Gas	1	71
Biodiesel	1	10
Hybrid (Shared OCGT / Flex Gen)	1	365 Shared OCGT / Flex Gen
Hybrid (Wind / Battery)	2	206 Wind / 110 Battery
Hybrid (Solar / Battery)	6	453 Solar / 379 Battery
Hybrid (Sync.Cond / Battery)	1	200
Grand Total	53	3,944

³ <https://www.esbnetworks.ie/docs/default-source/publications/ecp-2-ruleset.pdf>

⁴ The cap on the storage and other system service technology projects dictates that the ECP-2.4 Category A batch contains 62 projects.

ECP-2.4 –Final List of Projects for Category A

** Please note that the 'assumed nodes' have been assigned based on Gate 3 Nodal Assignment Rules and are for guidance purposes only. They are subject to change once studies commence.
