

EWIC Biodiversity Action Plan Biodiversity Actions 2019-2023

Action: Sow yellow rattle seed (Native certified)

Objective: Promote wildflowers by reducing

Action: Install infrared camera **Objective:** Identify mammals

EIRGRID Delivering a cleaner energy future

In collaboration with

EWIC Biodiveristy Project Drivers

2023

Trees on the Land

Biodiversity (2019)

Action: Hand remove perennial weeds Objective: Promote wildflower diversity

> Action: Plant new native woodland Objective: Increase habitat

Action: Plant native orchard

Objective: Enhance pollinator and bird food

Action: Install hinged nest box **Objective:** Provide hole nesting bird habitat and monitor occupancy

Objective: Promote woodland flora

Project Timeline

Wetland meadow creation

Final Botanical monitoring report

2023

Action: Fence and stop mowing rank grass area Objective: Rank scrub habitat for nesting birds

EWIC Converter Station

Action: Expose south-facing earth Objective: Create mining bee

Objective: Encourage natural wetland

vegetation without commercial seed

*Yellow rattle seed is the only commercial seed sown at the site.
