RE: Proposed Clashavoon – Dunmanway 110kV Line

Dear Sample,

EirGrid, the Transmission System Operator for Ireland, has identified the need for electricity transmission system Development within the region. The proposed development will involve the construction of a new 110kV line between the existing Clashavoon 110/220kV substation which is located approx 4km northeast of Macroom and the existing Dunmanway 110kV electricity substation located on the outskirts of Dunmanway.

The project is at the landowner consultation and survey stage, this is an early and important stage in the process. It will be an opportunity for landowners to outline any concerns or suggestions for consideration before the line route and structure locations are finalised and lodged for planning approval.

ESB International have been appointed consultants to EirGrid in relation to this development and over the coming weeks, members of the project team will visit landowners along the identified indicative route.

For your information, please find enclosed the following;

- EirGrid Survey Letter
- Survey Map
- Project Briefing Document
- ESB / IFA Code of Practice

Please direct all correspondence quoting your landowner number as follows:

By Post: Project Manager
Clashavoon - Dunmanway project,
