Clarification of the term major Outage

A major **Outage** is any outage of:

- A **Generation Unit**, excluding **Hydro Units**
- A **Wind Farm Power Station (WFPS)** with a **Registered Capacity** of 30MW or more

And where the outage also meets one or more of the criteria listed below:

- a) Has a duration of at least four calendar weeks; and/or
- b) Results in a modification to the **Registered Operating Characteristics** of the **Generation Unit** or **Wind Farm Power Station**.
