Introduction

Post webinar, queries can be emailed in the clarification template to <u>tenders@eirgrid.com</u>,<u>tenders.soni@soni.ltd.uk</u>

Closing date for receipt of queries is 12 noon on 23rd July 2025.

The presentation slides will be made available on eTenders and on the EirGrid and SONI websites.

Procurement Process Overview

Qualification System

- Qualification System refers to the system that is in place to enable interested parties to submit a Response and subsequently qualify for award of Contract for provision of DS3 System Services (under Volume Uncapped Arrangements). Qualification System will last until April 2026, unless extended by Regulating Authority Agreement.
- Various System Services are being procured as part of the Qualification System, over 24 lots (12 for EirGrid and 12 for SONI).

Gate Process

- Gate Process refers to the period after the initial procurement Phases 1 and 2 whereby Tenderers may apply for a place on the Qualification System at any time.
- New applicants may submit a completed Response for a place on the Qualification System at any time.
- It is intended that specific contracts will be awarded every six months these periods are referred to as Gate Dates. EirGrid will issue periodic notices on the OJEU / EirGrid websites outlining the requirements and timeframes involved. Indicative dates are contained in the briefing document.

DS3 System Services Agreement

This procurement is being run jointly by EirGrid and SONI for their respective DS3 System Services Agreement.

> A separate DS3 System Services Agreement is in place for:

- EirGrid (as contracting entity for the DS3 System Services Agreement applicable to Ireland) and
- SONI (as contracting entity for the DS3 System Services Agreement applicable to Northern Ireland).

Existing holders of an agreement will receive an amended Schedule 9; new parties to the Qualification System will receive an agreement dated 1st October 2025.

Gate 13

- E tenders: CFT 4861771 ENQEIR929 DS3 System Services Volume Uncapped Gate 13 published on the 20th June 2025
- Mytenders: RFT reference: Ref No: 233478 SONI051 DS3 System Services Volume Uncapped Gate 13 published on the 20th June 2025
- > Two stages in this procurement process (submitted together):
 - Pre-Qualification; and
 - o **Tender**
- ≻ Lots
 - Lots 1-12 IE
 - Lots 1-12 NI
- > Documents available on eTenders <u>www.etenders.gov.ie</u> and mytenders <u>www.mytenders.co.uk</u>

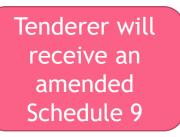

Gate 13

➢ Gate 13 applies to 3 scenarios:

- 1) Providing Unit that is not currently contracted for the ______ provision of any System Service and wishes to tender for one, some or all services;
- Providing Unit intends to amend its contracted values for a service that it currently provides (this may be enhancing or reducing its capability);
- Providing Units that do not wish to amend their existing provision of a particular service must <u>not</u> submit a tender for the respective Lot.

Tenderer will receive a new agreement

Gate 13 Lot Numbers - EirGrid

	Existing Services								
POR L1IE	Primary Operating Reserve	SSRP L7IE	Steady State Reactive Power						
SOR L2IE	Secondary Operating Reserve	SIR L8IE	Synchronous Inertial Response						
TOR1 L3IE	Tertiary 1 Operating Reserve	RM1 L9IE	Ramping Margin 1 Hour						
TOR2 L4IE	Tertiary 2 Operating Reserve	RM3 L10IE	Ramping Margin 3 Hour						
RRD L5IE	Replacement Reserve (De-Synchronised)	RM8 L11IE	Ramping Margin 8 Hour						
RRS L6IE	Replacement Reserve (Synchronised)	FFR L12IE	Fast Frequency Response						

Gate 13 Lot Numbers - SONI

	Existing Services								
POR L1NI	Primary Operating Reserve	SSRP L7NI	Steady State Reactive Power						
SOR L2NI	Secondary Operating Reserve	SIR L8NI	Synchronous Inertial Response						
TOR1 L3NI	Tertiary 1 Operating Reserve	RM1 L9NI	Ramping Margin 1 Hour						
TOR2 L4NI	Tertiary 2 Operating Reserve	RM3 L10NI	Ramping Margin 3 Hour						
RRD L5NI	Replacement Reserve (De-Synchronised)	RM8 L11NI	Ramping Margin 8 Hour						
RRS L6NI	Replacement Reserve (Synchronised)	FFR L12NI	Fast Frequency Response						

Tender Response

> Tenderers must submit a separate standalone tender for each and every Providing Unit.

> Note: A Tenderer may have more than one Providing Unit.

> Tenders should be split into two constituent parts (submitted at the same time):

- A pre-qualification section; and
- A tender section.
- > Tenderers' response for each Providing Unit should consist of:
 - Part 2 of the Qualification System Briefing Document, including Forms 1, 2 and 3; and
 - A Completed **Technical Questionnaire** sheet for each Lot they are submitting for (must be completed in Excel).

Tender Evaluation

All Responses will be evaluated, on a lot-by-lot basis and Providing Unit by Providing Unit basis, against the qualification and award criteria outlined in the tender pack.

Tender evaluation:

- o against the Pass / Fail pre-qualification minimum requirements for the lot concerned; and
- against the award criteria for compliance in line with the technical requirements for the lot concerned.

As the payment rate (tariff) for each System Service will be fixed, Responses will be assessed under the award criteria based upon quality (technical compliance) only.

Tender Queries

> Queries Arising from this Webinar

- $\,\circ\,$ We will verbally answer some queries received via Q&A today.
- Formal response will issue to all Tenderers which may supersede information provided today.
- $\,\circ\,$ We request Tenderers to formally submit queries via email.

General Queries

- $\,\circ\,$ Submit by email.
- $\,\circ\,$ In Clarification Template.
- $\,\circ\,$ Not later than 12:00 noon Irish Time on 4th July 2025.
- Addressed to: Jamie Cosgrove and email <u>tenders@eirgrid.com</u> (Ireland)
- Addressed to: Deirdre Fraser and email <u>tenders.soni@soni.ltd.uk</u> (N. Ireland)

 $_{\odot}$ EirGrid and SONI anticipate to respond to all queries by 11th July 2025.

SONI - DS3 System Service - Volume Uncapped - Gates

- Please note, all submissions intended for SONI DS3 System Service Volume Uncapped Gates, should be submitted using the United Kingdom Tenders Platform only, <u>www.mytenders.co.uk</u>.
- Please register your company on www.myTenders.co.uk to receive notice of any potential SONI contract notices for DS3 System Service Gates. SONI will not accept any tender submission which has not been uploaded to the <u>www.myTenders.co.uk</u> tender box prior to the SONI tender closing time. Please note, we will not accept any SONI tender submissions for DS3 System Service Gates through the <u>www.etenders.gov.ie</u> platform, this platform should be used for EirGrid submissions only. SONI is not responsible for any impact on any tenderer who does not submit their SONI tender through the correct platform as outlined above.
- If you require assistance with registering on <u>www.mytenders.co.uk</u> website or are having difficulty uploading your tender response to the website, please contact their helpdesk on 0800 2229006. SONI cannot provide technical assistance with this website.
- Tenderers should email <u>tenders.soni@soni.ltd.uk</u> for SONI queries or clarifications, thank you.

Submission of Tenders

- Interested Tenderers must submit a tender response through the eTenders portal in respect of the relevant Lot for EirGrid and myTenders portal in respect of the relevant Lot for SONI.
- Tender box close time for EirGrid submissions 12 noon, Irish Time, on Wednesday 23rd July 2025 eTenders will not allow upload after this time.
- Tender box close time for SONI Submissions 12 noon, GBP Time, on Wednesday 23rd July 2025 myTenders will not allow upload after this time.
- > The Tenderer is fully responsible for the timely delivery of the tender.
- Tenderer must log in early and ensure you are registered to submit your tender documents. Go to the website <u>www.etenders.gov.ie</u> for EirGrid or <u>www.mytenders.co.uk</u> for SONI and follow their instruction relating to registration requirements.

Tender Timetable

Event	Date

Sample Lot - Section A

Section A.1 is for Candidates that are applying to amend their existing contracted service values.

1.1 Has the Providing Unit an existing DS3 System Services Agreement for Regulated Arrangements for POR for a non-zero value and is applying to change the Tenderer must respond YES. Reserve Characteristic for POR relative to the values specified in its DS3 System Services Agreement or to change from Static to Dynamic service provision or If the Providing Unit is not an Aggregator, please confirm the Connection Point. If the vice versa? Providing Unit is an Aggregator, please see below. If not currently connected to the Power System but planning to be connected by 1 April 2025 please provide a detailed project programme (MS Project Format or similar) and proof of connection agreement or letter from relevant system operator (EirGrid, SONI, ESB Networks, NIE Networks) confirming connection by 1 April 2025. If the Providing Unit is an Aggregator, please see below. If the Providing Unit is an Aggregator please provide all associated MPRN meter numbers, and Individual Demand Sites or Generator Sites details, as outlined in the Grid Codes (EirGrid section PC.A4.13 for AGU, EirGrid section PC.A7 for DSU) by filling out the System Services Site Info tab. Aggregators must be able to provide all contracted capability by 1 April 2025 and that capability must be reflected on the Providing Unit's Operational Certificate on or before 1 April 2025. To ensure any changes to a Providing Unit's Operational Certificate can take effect from 1 April 2025, the DSU application form must be submitted to DSU@EirGrid.com on or before 25 February 2025. Where an Individual Demand Site or Generator Site is not currently contracted with the Aggregator, the Providing Unit must provide satisfactory evidence, for example a letter of Note: DSU application form is available here: intent, that such contracts will be in place by 1 April 2025. Where an Individual Demand Site https://www.eirgridgroup.com/customer-and-industry/general-customer-information/grid-code-compliance-test/complianceor Generator Site is currently contracted to another Aggregator, in order to complete the testing/dsu/ transfer of an Individual Demand Site or Generator Site into the Operational Certificate of the tendering Providing Unit effective1 April 2025, the TSO will require written confirmation from the Individual Demand Site or Generator Site stating that it consents to the transfer taking place on or before 1 April 2025. The TSO will then notify the other Aggregator.

EirGrid SONI

The revised technical questionnaire requests that DSUs submit the Application form associated with their Operational Certificate at least 6 weeks prior to Contract execution. Aggregators take note of Q1.1 specifically relating to individual sites that are not currently contracted with the Providing Unit.

Sample Lot - Section A

1.2B If the answer to question 1.2A above is NO, please confirm:

Has the Providing Unit conducted testing with the TSO to demonstrate capability to provide the POR service and has not yet had a test report approved by the TSO? OR. Has the Providing Unit submitted a Testing Request to the TSO and the TSO has agreed to a date, which must not be after 7 February 2025, for testing to take place? Has the Providing Unit submitted test data (witnessed as required by the TSO), or performance data, to the TSO and the TSO has agreed to evaluate the Providing Unit's capability to provide the POR service based on the data? Note 1: Tenderer must have engaged with the TSO regarding the Providing Unit's testing requirements in advance of tender submission. Note 2: If Tenderer opts to submit test data or performance data (witnessed as required by the TSO), data must have been gathered within the 12 months prior to the last testing date of the current tender period. Note 3: If Tenderer is a DSU, Tenderer must submit a completed DSU application form when requesting a test date, which must include all Individual Demand Sites that are to be tested. Note 4: If Tenderer is a DSU or AGU and is intending to test an Individual Demand Site or Generator Site that is currently contracted to another Aggregator, Tenderer must provide signed correspondence (or e-mail approval) from the Individual Demand Site or Generator Site confirming that the Individual Demand Site or Generator Site will ensure to declare down availability with the other Aggregator during any associated testing period. Note 5: Tenderer must submit a System Services Testing Scope Document within 2 working days of confirmation of a test date. Note 6: Following testing, Tenderer must submit a completed System Services Test Report and Checklist to the TSO within 10 working days of the testing date as per the Testing process. This deadline will be strictly enforced by the TSD. Where the Tenderer has outsourced testing to a third party, it is the Tenderer's responsibility to ensure that testing requirements and Test Report deadlines are met. Test Reports must be in the correct System Services Test Report template. Note 7: The TSO's testing procedures and requirements apply to this procurement process. DS3 System Services Testing Scope Document, Test Report and Checklist templates are

Note 7: The TSD's testing procedures and requirements apply to this procurement process. DS3 System Services Testing Scope Document, Test Report and Checklist templates are available here: http://www.eirgridgroup.com/customer-and-industry/general-customer-information/grid-code-compliance-test/compliance-testing/system-services-testing/index.xml Note 8: If performance data is to be used in evaluating a units capability in provision of POR, the assessment criteria will be based on the Grid Code definition of POR Note 9: If POR capability is to be reduced for a Providing Unit, a test report reflecting the revised capability must be submitted. Tenderer must respond YES.

Tenderer must provide written confirmation from the relevant system operator confirming that:

Testing has taken place. Tenderer must state the test date.

OR

If a Testing Request has been submitted, that the TSO has agreed a date, which must not be after 7 February 2025 , for testing to take place. Tenderer must state the test date. OR

If test / performance data has been submitted, that the TSO has agreed to evaluate the Providing Unit's capability to provide the service based on the data.

Also included a note for existing units stating that if capability is to be reduced a revised test report reflecting the reduced values must also be submitted.

Additional note for tenderers who opt to submit test data or performance data.

Aggregator Site Switching

- A service provider managing an aggregated DSU / AGU may submit a tender in respect of a Providing Unit comprising a list of constituent sites where for such sites there is either:
 - \circ an active contract in place between the service provider and the site; or where a site is not currently contracted with the Aggregator, satisfactory evidence, for example a letter of intent, that such contracts will be in place by 1st October 2025.
- > All necessary testing as specified under the procurement rules must be completed by the deadlines specified within the procurement.

Tender Pack and Technical Questionnaire

Q&A

TSOs will provide a verbal response to select queries received during the webinar. All queries will receive a written response following the webinar.

Testing and Signalling

DS3 System Services Compliance Webpage

EirGrid website has a DS3 System Services compliance webpage at System Service Testing | Grid Codes and Compliance | EirGrid

> System Services test reports and procedures per technology type

System Services signalling requirements / lists per technology type

Any questions on testing / signals can be directed to the relevant testing team:

- Generator_Testing@SONI.ltd.uk
- Generator_Testing@EirGrid.com
- DSU@eirgrid.com (for DSU related queries in IE)

Tender Testing Requirements

- > Tenderers **must** engage with our testing teams prior to tender submission
- > Tender submissions **must** be accompanied by:
 - Approved recent DS3 System Services Test Report
 Or
 - Evidence of recent testing, where a Test Report has not yet been approved Or
 - Confirmed Testing Date
 - Or
 - Confirmation from TSOs that alternate test data can be used for the purpose of demonstrating capability. If Tenderer opts to submit test data, data must have been gathered within the 12 months prior to the last testing date of the current tender period. In the case of Gate 13, data must have been gathered between the 15th of August 2024 and 15th of August 2025.

Testing Dates

- Early engagement please.
- Please contact us now to book testing slots if you intend to tender for services.
- > Testing Dates (subject to availability) Gate 13
 - Last date: 15th August 2025
 - > Test dates must be agreed: Before the tender submission.
 - > This applies to all testing whether witnessed or unwitnessed by TSOs
- Testing deadlines will be enforced e.g. all reports must be submitted within 10 business days post-test date (note - TSOs may return reports that are incomplete)

Testing Documentation

- Scope Document to be submitted 2 BD following confirmation of test date outlining the services the unit wishes to contract for including a detailed plan and timeline of how they will achieve these goals.
- Checklist A checklist is to be completed with each report to ensure all required aspects of a complete report are met. This is to help mitigate delays at the report reviewing stage. Must be fully completed.
- > Test procedure Must be submitted at least 10 BD in advance of testing.
- Load Profile Must be submitted at least 2 BD in advance of testing to <u>neartime@eirgrid.com</u> copying <u>Generator_Testing@EirGrid.com</u> or <u>DSU@eirgrid.com</u> for DSU related test.
- > Templates for the documents are available on the EirGrid website.

Testing Documentation

Good practices:

- File name ie. Reports, to be named contained the name of the unit, testing type and version. (UnitName OR Test Report v2)
- It is the tenderer responsibility to make sure Generator Testing receive the reports.
- Version history on both file name and section history inside the document, any header and footer must match.
- > Operating Reserve reports: Pre-event output as per tender document.
- Highlight proposed changes vs existing contracts e.g., proposed values in RED text.

Updated Testing Documentation

> Testing to reset performance scalar.

- The existing report template was designed for contracting. It uses 'minimum sustained MW' to determine achieved volumes.
- New report template will be published for units who carry out testing to reset performance scalar. The assessment methodology (and pass criteria) will be as per performance monitoring.

Technology	Report	Test Procedure		
WFPS/SFPS	Published	N/A		
Conventional	Published	Drafted		
Batteries	Drafted	Drafted		
Interconnector	Drafted	Drafted		
Aggregator	To be drafted	ТВС		

Testing of DSUs

- Early engagement please
- >When requesting a Testing Date:
 - > DSUs must submit a DSU application at the same time
 - Ramping or Capacity tests only witnessed as needed new DSU or testing above 5 MW
 - > Tests will still be scheduled via existing calendar process
- Individual Demand Site switching:
 - Please ensure that applications are supported by satisfactory evidence, for example a letter of transfer for IDS switching aggregators and that contracts with the site will be in place by 1st October 2025.

Reserve Testing Standards

> No change to the testing standards from Gate 12

> For reserve services, the following standards apply:

- Conventional units a frequency injection of 200mHz to 500mHz
- > Wind farms a frequency injection of 200mHz
- > Aggregators based on the unit's reserve trigger(s)
- > Interconnectors based on the unit's reserve trigger(s)
- > Batteries based on the unit's reserve trigger(s)

TOR2 assessment:

- > TOR2 may be assessed from a frequency injection
- TOR2 may be assessed based on approved TOD and verify through real dispatch.

Signalling Requirements

> Certain DS3 System Services have specific signalling requirements:

- Dependent on the Providing Unit's technology
- > Noted in the relevant Lot of the Technical Questionnaire
- Published on the DS3 System Services Compliance webpage
- Refer to 'DS3 System Services New Signaling Requirements for the Regulated Arrangements' document dated November 2019 (in tender pack)

> Signalling requirements obligations must be met by **22nd August 2025**:

- Providing Unit must request a site-specific Signal List
- TSO issues site-specific signal list (based on TSO templates & site-specific info)
- > Providing Unit must make the signals available to the TSO (at interface)
- Providing Unit must complete, sign and submit the site-specific Wiring Certificate

Questions

Q & A

TSOs will provide a verbal response to queries received during the webinar. All queries will receive a written response following the webinar.

Webinar Concluded

Queries on Volume Uncapped Gate 13:

> Send no later than 12:00 hrs Irish Time on 4th July 2025 To: tenders@eirgrid.com and tenders.soni@soni.ltd.uk

EirGrid & SONI will respond to all queries by 11th July 2025.

Webinar slide deck will be published shortly.
