

ECP-2.3 IE Wind & Solar Draft Generation Assumptions

Generation < 1 MW has not been modelled as part of the ECP-2.3 Constraint Analysis.

This data has been collated using the best information available, however, if any significant discrepancies are noted please immediately contact info@eirgrid.com.

Maximum Export Capacity (MEC) has been rounded up for reporting purposes, exact MEC figures have been used within the model. Data freeze date: 12/10/2023.

* For the sole purpose of the ECP-2.3 Constraint Analysis, the priority status assumption is based on whether the unit was connected before the date 04/07/2019 – as referenced in Article 12, EU Regulation 2019/943.
