

# Met Mast & Alternatives Study Update

31<sup>st</sup> January 2018  
Aishling Goulding  
Near Time Operations

# Progress Update

- Industry survey circulated to collate data surrounding met data signal sources and high wind speed shutdown - some wind farms yet to complete the survey
- EirGrid issued draft guidelines for consultation in October 2017. IWEA submitted additional comments in January 2018 – under consideration.

WFPS Meteorological Signals Guidelines	
<b>Contents</b>	
1	DOCUMENT VERSION HISTORY 3
2	INTRODUCTION 3
3	GRID CODE REFERENCES 3
4	PROVISION OF METEOROLOGICAL SIGNALS 5
4.1	Acceptable Signals 5
4.2	Acceptable Location of Equipment 5
4.3	Acceptable Location and Measurement resolution 6
4.3.1	Wind Speed 6
4.3.2	Other Variables 7
4.4	Sampling rate 8
4.5	Measurement 8
4.5.1	Calibration 8
4.5.2	Meteorological Instrumentation 8
5	PERFORMANCE MONITORING OF DATA SIGNALS 9
6	FUTURE PROVISION OF METEOROLOGICAL SIGNALS 9
7	ACKNOWLEDGEMENT 9

# Progress Update

- Source of met signals confirmed for majority of wind farms included in the Independent study 'Met Mast and Alternatives'
  - Number of met signal sources different to that in study
- A second phase is required to finalise the Independent study
  - post I-SEM timeline

# Next Steps

- Finalise guideline document for publication
- Kick off WeProg independent study second phase
  - submit new met signal dataset for analysis
  - consider impact on conclusions and recommendations
