EIRGRID ASSESSMENT	
--------------------	--

OC10.4.5.2 Compliance of **Demand Side Units** with **Dispatch Instructions**

The following validation will be performed in real time:

- (i) A **Demand Side Unit** shall be deemed compliant if the **SCADA** signal confirms that the **Demand Side Unit MW Response** is within 5% of the **Dispatch Instruction**.

The following validation will be performed post event:

- (ii) A **Demand Side Unit** shall be deemed to be compliant with the **Dispatch Instruction** if the difference between the **Demand Side Unit Energy Profile** and the metered **Demand** plus the **Demand Side Unit MW Response** is within 5% of the **Demand Side Unit Energy Profile**.
- (iii) For **Demand Side Units** which are not **Dispatched** but have been declared **Available** in an **Availability Notice**, the **Demand Side Unit** shall be deemed to be compliant with its declared **Demand Side Unit Energy Profile** if the difference between the **Demand Side Unit Energy Profile** and the metered **Demand** is within 5% of the **Demand Side Unit Energy Profile**.
