1 Background

RESS 3 is the third Onshore Renewable Electricity Support Scheme by the Government of Ireland and is a pivotal component of the Programme for Government and the [Climate Action Plan 2023](#). RESS 3 uses a competitive auction process to determine which generators receive support. For projects that are successful in the RESS 3 Auction, this support typically applies for approximately 15 years.

The RESS 3 Auction ran as per the [RESS 3 Auction Timetable](#) following the Auction Submission Closing Date on the 15/09/23. The aim of this document is to publish the Provisional Auction Results determined by EirGrid in respect of the RESS 3 Auction, as set out in Section 9.4.2 (c) of the [RESS 3 Terms and Conditions](#)

The Provisional Auction Results are subject to approval and the reserved rights of the Minister for the Environment, Climate and Communications as set out in Section 10 of the RESS 3 Terms and Conditions.

2 Qualification

A total of 36 projects applied to participate in the RESS 3 qualification process. The Final Qualification Results, as approved by the Minister for the Environment, Climate and Communications, qualified 33 projects to participate in the RESS 3 Auction. One project did not qualify, and 2 projects formally withdrew from the process.

The RESS 3 Auction submission window for Offer Prices opened on 08/09/23 at 10:00 and closed on 15/09/23 at 12:00. Of the 33 projects that qualified to participate in the RESS 3 Auction as approved by the Minister, 31 projects submitted an Offer Price for their project via the RESS Auction Platform before the deadline of 12:00 on 15/09/23.

EirGrid ran the auction on the afternoon of 15/09/23. Of the 31 projects who submitted an Offer Price in respect of the RESS 3 Auction, 23 projects have been provisionally successful in the auction and 8 projects have been provisionally unsuccessful in the auction.

3 RESS 3 Auction Timetable

Table 1 sets out dates for the main milestones of the RESS 3 Auction in accordance with the RESS 3 Terms and Conditions. The publication of this report represents the completion of the Provisional Auction Results milestone.
