Background

In September 2024 the CRU published its *Electricity Generation Policy – Generation and System Services (ECP-GSS) Decision Paper* (CRU/2024101¹) which will support the delivery of Ireland’s renewable electricity targets and support Ireland in achieving compliance with the Renewable Energy Directive III (RED III). As part of the ECP-GSS Decision (CRU/2024101), the System Operators were required to prepare and submit to the CRU in January 2025 proposals for the Pre-engagement Process and the High-level Technical Assessment (HLTA) including timelines, fees, required inputs and outputs, and other specific details. Following the submissions of these proposals, the CRU published its *Electricity Generation Policy – Generation & System Services: Pre-engagement Process and High-level Technical Assessment Proposed Decision Paper* (CRU/202558²) in April 2025 which set out the CRU’s proposed decisions on the Pre-engagement and HLTA process, including in relation to timelines, HLTA validity periods, approach for non-RED III projects (i.e. conventional generation projects, energy storage projects which are not co-located as per the RED III definition, or other system services technology projects), application fees, inputs and outputs of the process, and transitional arrangements.

A Pre-application Notification window opened for the period 16th June – 30th June 2025. Both RED III and non-RED III projects were required to submit a “Pre-application Notification” to the relevant System Operator by 30th June 2025. Only applicants who had submitted a Pre-application Notification were entitled to apply for a grid connection in ECP-GSS-1. The application window for ECP-GSS-1 closed on 30th September 2025.

This publication contains the initial list of applications that applied to the TSO in ECP-GSS-1.

Please note that the projects in ECP-GSS-1 may change should projects not proceed with their application or no longer be deemed eligible.

Applications are summarised in the table below:

Generation Type	Total Applications	Total Sum of MEC (MW)
Solar	27	3064
Wind	16	971
Battery	9	1097
OCGT	1	31
CCGT	1	40
Hybrid (Solar/Battery)	6	960
Grand Total	60	6163
